Career Objective

Aspiring **Computer Science Engineering Student** with a strong academic foundations, eager to apply theoretical knowledge to practical challenges. Seeking opportunities to contribute to innovative projects, learn from industry professionals, and grow in a fast-paced, technology-driven environment.

Education

St. Joseph's College of Engineering, B.E in Computer Science

- CGPA : 8.18/10

2023-2027

Christ The King Matric Higher Secondary School, Kumbakonam

- Percentage : 90 %

2022-2023

Experience

RepuNEXT – Web Development Intern (June - July 2025)

- Developed and deployed a Library Management System with CRUD operations, user authentication, and session management using HTML, CSS, PHP, and MySQL. Gained hands-on experience in frontend and backend development, improving skills in debugging and version control (Git). Worked through the full software development lifecycle, from requirement analysis to deployment.

Projects

AgroAura: AI-Powered Agricultural & Gardening Assistant

- AI platform with Visual BioTwin, multilingual chatbot, and smart agents for crop planning, disease detection, and market insights.

Smart Hospital Management System (SHMS)

- AI-powered system for patient triage, resource allocation, and real-time hospital data flow with FHIR interoperability.

College Visitors Database Web Application

- Secure web app for visitor management with automated log tracking, built using HTML, CSS, JavaScript, and MySQL.

Indian Version of Nagish App

- AI-based app for deaf and mute communication with speech-to-text, sign language recognition, and offline support.

Hacathon & CTF Experience

Hackfinity 2025 – Finalist | Top 10 | Best Presentation Award

- Built an AI-powered smart farmer assistant app to support crop planning and resource management.

Innothon 2024 – Finalist

- Developed a hospital management web application to streamline patient and staff workflows.

E-Cell Ideathon 2024 – Finalist

- Designed a digital ecosystem to connect children with educational and creative resources.

IIT Shaastra 2025– Finalist

- Presented a tech-driven prototype addressing sustainability challenges with a scalable solution.

Mapathon 2025

- Mapped and visualized culturally significant locations using digital tools for better accessibility.

Startup TN Idea Pitching 2024

- Pitched an innovative on-demand laundry service application.

CTF Competitions - IIT Shaastra - CTF, The Squid Hunt 2.0 , Vishwa CTF

Technologies

Languages : Python, Java

Technologies : MySQL, Kali, HTML, CSS, Networking, Data Structures, Machine Learning
